

Alex Reinoso

Full Stack Software Engineer

+593-99-895-2718 · ralexjessiel@gmail.com · github.com/aReinoso007 · linkedin.com/in/alex-reinoso/

SUMMARY

Full Stack Engineer with 4+ years building scalable web apps across research analytics, banking, and education. Proficient in React, Angular, TypeScript, Java Spring Boot, Node.js, Python, REST and GraphQL APIs. Bilingual (EN/ES). Currently pursuing a Master's in AI at UNIR. Actively uses AI-assisted tools (Claude, Cursor) to accelerate delivery.

EXPERIENCE

Full Stack Software Engineer · **Reframe Data — AllSci** · Mar 2024 – Present

- Built full-stack features for an AI-powered research analytics platform (12M+ hypotheses, 200M+ articles) using React, TypeScript, Angular, Java Spring Boot, Node.js, and Python.
- Integrated OpenSearch and OpenAlex APIs for large-scale academic data retrieval; consumed GraphQL APIs to optimize frontend data fetching.
- Developed data transformation pipelines and interactive dashboards using Apache ECharts; optimized PostgreSQL and OpenSearch queries for large datasets.
- Collaborated with design team to translate Figma designs into responsive UIs with Tailwind CSS; contributed to architecture decisions across frontend and backend.
- Leveraged Claude and Cursor for AI-assisted development, accelerating feature delivery and code quality.

Technologies: React, Angular, TypeScript, Java Spring Boot, Node.js, Python, PostgreSQL, OpenSearch, GraphQL, Apache ECharts, AWS, Tailwind CSS, Supabase, Grafana

Full Stack Developer · **Bayteq** · Feb 2022 – Mar 2024

- Developed and maintained Java Enterprise apps (JSF/Primefaces, Spring Boot, JPA/Hibernate) on IBM WebSphere; delivered a loan management and payments platform.
- Built Angular SPAs for purchase/service order management; implemented SOAP endpoints and REST API integrations with Spring Boot backends.
- Migrated banking mobile app from Ionic 4 to Ionic 6 (Capacitor); built and deployed Android APKs. Set up Jenkins and GitHub Actions CI/CD pipelines.
- Configured Keycloak for identity management; generated reports with Jasper Reports; refactored Oracle SQL scripts for performance. Led a cross-functional engineering team.

Technologies: Java Spring Boot, JSF, JPA/Hibernate, Angular 8/12, Oracle SQL, Keycloak, IBM WebSphere, Jenkins, Ionic 6, Jasper Reports, SOAP, REST API

Frontend Curriculum Designer · **Coding Temple (Contract)** · Nov 2023 – Feb 2024

- Designed React/TypeScript curriculum covering hooks, state management, GraphQL, Jest testing, and CI/CD with GitHub Actions and Vercel.

SKILLS

Frontend: React, Angular, TypeScript, Tailwind CSS, Redux, Apache ECharts **Backend:** Java Spring Boot, Node.js, Python, REST, GraphQL, SOAP

Databases: PostgreSQL, Oracle SQL, OpenSearch, Supabase **DevOps:** AWS, GitHub Actions, Jenkins, Git, Docker

AI Tools: Claude, Cursor, GitHub Copilot **Languages:** Spanish (Native), English (Bilingual)

EDUCATION & CERTIFICATIONS

M.S. Artificial Intelligence · Universidad Internacional de La Rioja (UNIR) · *In progress*

B.Eng. Computer Science · Polytechnical Salesian University, Ecuador · GPA 3.8, Mention in Software Development

Certifications: RESTful Java Spring Boot – PMI (2023) · Java Spring Boot – Scrum Learning Society (2023) · IoT & Big Data Analytics – Cisco (2020)
